**Faster Technology and BP Sales Announce Establishment of Manufacturers' Representative Agreement**

*Faster Technology and BP Sales team up to better serve the design services needs of Xilinx users in the South Central Territory.*

Houston, Texas, 5 January 2011 - Faster Technology LLC (FTL) and BP Sales today announced the establishment of BP Sales as a manufacturers' representative for design services provide by FTL to Xilinx users in the South Central United States territory (Texas, Louisiana, Arkansas and Oklahoma). FTL is the Xilinx Authorized Training Provider (ATP) for the South Central US territory; this new agreement extends and expands our product offering to include design services for Xilinx customers and FTL hardware products provided in conjunction with those services.

"As the ATP for Xilinx we have worked extensively with BP Sales to service the training needs of Xilinx customers in their territory" says John McCaskill, President of Faster Technology. "With the increasing complexity of FPGA design and the trend toward greater reliance on outside services by Xilinx customers, we look forward to leveraging our ATP expertise to assist design teams in reaching their complexity and performance goals. This expanded relationship enables FTL and BP to best support the design services needs in the territory."

"With our focus on DEMAND CREATION, being able to provide both the highest level of training and design services through a single supplier relationship is critical to our customer's design success" says Eric Zepp, President of BP Sales. "This expansion of our relationship with FTL will accelerate design success for all of the Xilinx users in our territory."

**About Faster Technology, LLC**

Faster Technology (Katy, TX) develops high-performance Xilinx FPGA solutions that maximize processing throughput while minimizing latency. In addition to being a certified ATP, the company is also a Xilinx Alliance Program Partner, an Impulse Accelerated Technologies Platform Partner and a member of both the Xilinx SignOnce IP License and SignOnce Services Agreement Programs.
